Designs that work.

Web Designer & WordPress Developer

PROFILE

I am a web designer and WordPress developer who builds **thoughtful, fast and easy-to-manage websites** for brands, founders and creative teams. I work across the whole process — from the first sketch and design direction to custom themes, plugins, QA and launch — with a focus on clarity, accessibility and the details that make a site feel premium.

EXPERIENCE

Independent Web Designer & WordPress Developer

2021 — PRESENT

Freelance · Remote

- Design and build custom WordPress themes, plugins and WooCommerce storefronts from discovery to launch.
- Translate brand, content and business goals into responsive, accessible interfaces with a clear content model.
- Own the full delivery process: research, UI design, front-end development, WordPress build, QA and handover.
- Treat performance, accessibility, SEO and maintainable code as baseline requirements rather than add-ons.

SELECTED CONCEPT WORK

Lumen Studio

WORDPRESS · CUSTOM THEME

A studio site concept built around editorial typography, a flexible editor experience and a calm brand voice.

Nomad Supply

WOOCOMMERCE · STOREFRONT

A storefront concept exploring product storytelling, clear filtering and a frictionless checkout.

Pulseboard

SAAS · PRODUCT UI

A calm, keyboard-friendly analytics interface that makes dense product data easier to act on.

Verdant

CUSTOM THEME · BRAND

A botanical skincare concept balancing rich product storytelling with a simple retail experience.

TECHNICAL SKILLS

WordPress	Advanced
PHP	Advanced
HTML5 & CSS3	Advanced
JavaScript	Strong
Responsive design	Advanced
Theme & plugin dev	Strong

TOOLKIT

ACF Pro · WooCommerce · Gutenberg · Elementor · Tailwind CSS · Figma · Git & GitHub · MySQL · REST API · SEO · Accessibility · Core Web Vitals

Education

FrameCast

WORDPRESS PLUGIN · PRODUCT

An admin tool concept for creative teams, focused on batch exports and capability-safe workflows.

Atelier North

EDITORIAL · ART DIRECTION

An editorial furniture concept using generous type, quiet motion and a gallery-led rhythm.

All six projects are self-initiated concepts created for this portfolio. Interactive previews and source excerpts are available at imran.dev/demo.html.

SERVICES

- Website design & UI/UX
- Custom theme development
- Responsive front-end build
- WordPress development
- WordPress plugin development
- Website redesign & rescue

HOW I WORK

A six-step process keeps every project clear: **research, planning, design, development, testing and launch.** You get a defined scope, regular check-ins and a handover that leaves you confident running the site. No jargon, no disappearing acts, no surprise invoices.

Formal education details available on request.
